

# OC80

## OZONE GENERATOR

The OC80 is a stylish, compact and flexible ozone generator that is ideal for public rooms and areas where a fresh environment is vital for good business. Unpleasant odours and bacteria, typically found in public toilets, corridors, and waiting and treatment rooms can all be removed with this discreet and effective air and surface treatment system.

The OC80 helps organisations benefit from the natural odour killing properties of ozone without any disruption to public areas. It works discreetly in the background helping to maintain fresh, healthy air

with no interruption to everyday activity. All odours are continuously removed naturally, without the need to use environmentally unfriendly aerosols or other chemicals.

### KEY FEATURES

- Single unit suitable for rooms between 10 and 150m<sup>3</sup>
- Fully variable ozone output of between 2 and 80mg/hr
- Integral timer allows for 24 hour operation with up to 8 on/off times per day
- 30 day battery back up for timer programmer
- Plug and click design allows for “no tools” part replacement and servicing
- Lightweight cassette design makes installation easy
- Suitable for both fixed and portable operation
- RoSH approved

### TYPICAL APPLICATIONS

The OC80 is suitable for a wide variety of businesses and organisations. Typical applications include use by hotels, restaurants and cinemas to remove odours from public toilets and guest corridors, especially if affected by smoking or kitchen smells. Other commercial applications include health and fitness club changing rooms, company meeting rooms and food processing facilities.

Medical facilities and vets use the OC80 in waiting and treatment rooms where the bactericidal effects of ozone are particularly useful.
