Ozone OC80V2
Compact Air Purifier

The Natural Cleaner

The OC80V2 is a stylish, compact and flexible ozone generator that is ideal for public rooms and areas where a fresh environment is vital for good business. Unpleasant odours and bacteria, typically found in public toilets, corridors, and waiting and treatment rooms can all be removed with this discreet and effective air and surface treatment system. *In fact, it can be used anywhere that "fresh air" is needed.*

The OC80V2 helps organisations benefit from the natural odour killing properties of ozone without any disruption to public areas. It works discreetly in the background helping to maintain fresh, healthy air.

Key Features

- "Plug 'n Play" operation
- No environmentally unfriendly chemicals
- Lightweight cassette design makes for easy installation
- Suitable for both fixed and portable operation
- 30-day battery backup for timer programme
- Cycle or continuous operation to maintain "odour free" clean, fresh air
- Integral timer allows for 24-hour operation with up to 8 on/off times per day
- Low self-maintenance with a plug and click design allows for "no tools" part replacement and servicing

Typical Applications

The OC80V2 is suitable for a wide variety of businesses and organisations. Typical applications include use by hotels, restaurants and cinemas to remove odours from public toilets and guest corridors, especially if affected by smoking or kitchen smells. Other commercial applications include health and fitness club changing rooms, company meeting rooms and food processing facilities.

Medical facilities and vets use the OC80V2 in waiting and treatment rooms where the bactericidal effects of ozone are particularly useful.
